

# Ingredients for the Best Start in Life

**Nutrition plays a critical role in the first thousand days of life - from conception to early infancy. Although breast milk is the best nutrition for infants, there are times when this is not possible. For these cases, we are committed to helping you develop products that give children the best start in life.**

## Custom Nutrient Premixes

Our premixes for formulas, follow-on milks, and baby foods ensure the delivery of all the necessary nutrients for healthy development in early childhood, such as vitamins, minerals, amino acids, DHA and other vital nutrients.

We have developed a full range of infant-nutrition premixes that are 100% silicon dioxide-free and produced in our three infant-approved premix facilities.

## High-Quality Ingredients

Our commitment to quality, accountability, and reliability means you can feel confident in the products you are manufacturing. All our ingredients come from reliable and thoroughly evaluated suppliers.

Furthermore, we can design premixes which are compliant with the Chinese GB standards for infant formula products.

## Quality you can trust

- Silicon dioxide-free premixes
- Infant-approved premix facilities
- Compliance with Chinese GB standards
- Supply chain security

## Nutritional Ingredients

As a global leader in nutritional ingredients, we offer access to a wealth of options for early life applications.

Besides vitamins, we also offer the largest inventory of food-grade amino acids in Europe and the US, including options that are ideal for infant nutrition applications.

## Supply Chain Security

Our consolidated global supply chain network, own inventories, and production facilities help ensure continuity of supply and contract-price protection.

Our strict raw material verification and validation processes are aligned between our facilities. Documentation is thorough, standardised, and readily available to guarantee you the highest-quality ingredients.

## Our commitments

### Exceptional Quality Standards

Quality and safety are essential when it comes to infant nutrition — that's why premixes manufactured at our three infant-approved facilities are 100% silicon dioxide-free. We only source from suppliers we trust, and you can rely on us for complete traceability and transparency.

### Scientific Approach

Feel confident in the performance and impact of your products. Our ingredients and nutrient premixes are based on deep research to lay the foundation for lifelong health.

### Tailored Solutions & Support

We customise premixes for a range of infant product applications and tailor our approach to meet the specific nutritional needs of each developmental stage. At Prinova, our industry experts are ready to help you develop a formula that meets the label claims you are looking to achieve.
